

CONNERS
CLINIC

23andme Agreements

1. What you will receive:

- A **Video Series** (emailed to you over the next few weeks) with detailed explanation to help you understand your genes.
- A patient **Genetic SNP Report** similar to that seen in the video will be emailed to you prior to your time with Dr. Connors
- A patient **Supplement Report** will also be emailed to you. It contains the recommended supplements which may be purchased directly from our online STORE

2. Understand, Genetic 23andme patients cannot be considered full patients in our office since no formal exam is performed. The purpose of reviewing your 23andme is to give specific recommendations **based solely on your genetic picture, NOT other health concerns**. There is NO way to manage a patient's complete health history/needs simply by looking at the genes. It is expected and suggested that you consult with your local doctor as well.

3. Because of our busy schedule, any further communication with Connors Clinic (questions about care in any way) needs to be reserved for FULL patients (those that have chosen care in our office). **We do not accept questions via phone or email**. Should you need more service, we suggest you follow the FIRST STEPS page of our website and schedule a Case Review with Dr. Connors.

By purchasing a Genetic 23andme Review, you are agreeing to the above agreements

THANK YOU
